

HAWI DEMOZ

Electrical & Computer Engineer | Full Stack Developer

hawipeter1@gmail.com | +251 963 897 458 | Addis Ababa, Ethiopia | [linkedin.com/in/hawi-demoz](https://www.linkedin.com/in/hawi-demoz) | github.com/Hawi-Demoz

PROFILE

Electrical and Computer Engineer from Addis Ababa University (AAiT) building full stack applications and engineering systems across signal processing, wireless communication, and embedded systems. Works across the stack with Angular, React, FastAPI, and Flask, with a research background in audio steganography and network planning.

EXPERIENCE

Software Developer Intern, The Premier Ethiopia Technologies 09/2025 to 04/2026
Addis Ababa, Ethiopia

- Designed and built an Employee Management System covering employee records, roles, and administrative workflows.
- Implemented authentication, role based access control, and CRUD operations on a relational database.
- Owned UI and usability decisions that shaped how the system was used internally.
- Worked within a team to build scalable, maintainable web components.

Independent Projects, Addis Ababa, Ethiopia 01/2024 to Present

- Built and shipped full stack applications end to end, from architecture through deployment.
- Applied version control and collaborative workflows using Git and GitHub across projects.

SKILLS

Languages: Python, JavaScript, TypeScript

Frontend: Angular 19, React, Tailwind CSS

Backend: FastAPI, Flask, SQLAlchemy 2.0, PostgreSQL

Engineering: MATLAB, Embedded Systems, Signal Processing, Audio Steganography, Wireless Network Planning

Tools: Git, GitHub, VS Code, Figma

PROJECTS

Muse
A creative collaboration and project management platform for visual folios, shared work, deliverables, and creator profiles. Frontend built with Angular 19 using standalone components and signals, styled with Tailwind CSS. Backend built with FastAPI and SQLAlchemy 2.0, running on PostgreSQL in production with SQLite as a local fallback, including JWT authentication, role based access control, and pytest coverage across core workflows.

Adaptive Audio Steganography
An adaptive audio steganography system that embeds secret information into digital audio while preserving sound quality, with adaptive embedding techniques evaluated against signal quality metrics.

Wireless Cellular Network Planner
A cellular network planning system analyzing coverage requirements, cell placement, frequency reuse, and network capacity to improve communication efficiency.

Employee Management System
A web based HR management system for employee records, attendance, departments, and organizational workflows, with full CRUD functionality and a responsive interface.

CERTIFICATES

- Power Learn Project: training in Python programming, web development, and software engineering fundamentals.
- Carnegie Mellon University Africa (Rwanda): regional tech training initiative covering programming fundamentals and problem solving.
- Infnova Technologies: Python programming and problem solving training.
- National Essay Competition (AfriYAN and TAYA): placed second for an essay on the role of youth in promoting gender equality.

VOLUNTEERING

Yewedekutn Ansu, Addis Ababa 05/2025 to Present
Supported community initiatives focused on the well-being of older adults through volunteer service and outreach.
